### Outstanding Characteristics

#### Dimension stability
It will not lose shape after 20 year's, it will not crack under test temperature between -40° to 60°c

#### Maternal Safety
Low flame spread/High slip resistance/No splintering of wood/Contains no toxic chemicals or preservatives/environmental friendly/can be 100% recycled

#### High Strength
Outstanding screw and nail retention/High impact resistance/Great Compressive-tensile-shear strength/Modulus of elasticity: 20% greater than PVC.

#### Appearance & touch
Natural feel & wood touch/broad range of finishes and appearance, multicolour, and no painting required.

#### Longevity
Its life span is at least 20 years in outdoor weather conditions

#### Install and maintain easily
Easily fabricated/Easy to cut, fix and glue/easy to drill and nail/low maintenance/no need to apply water sealant or to stain

It is simple when considering products that are better for the environment, more robust and more cost-effective.

- SGS
- UV Resistance report from SGS
- BSCI Audited Supplier
Decking

Decking and Flooring is one of the leading composite decking suppliers. Our buyers have sourced the best manufactures and are therefore able to supply you with the most advanced range of composite decking.

Founded in 2002, Decking and Flooring compliments the strategy of environmental protection, specializing in environmentally synthetic decking by using bamboo wood waste, recycled plastic as raw materials. Characterise as pollution free and recyclable, our renewable products are favourable substitutes to traditional bamboo and wood products. These products can be widely used in architectural decoration, gardening and municipal engineers.

Today with all nations advocating energy saving and emission reduction, resource shortage and environmental contamination raise more and more public concerns. We appreciate that much attention has been given to how products are made and what they are made from. In supplying products made entirely from waste plastic and waste wood, we have demonstrated our commitment to our future!
Traditional decking

Traditional decking is the popular choice in the market. If you are looking for a basic product which is stable and economic, the traditional decking range is your best option.

Decking and Flooring traditional decking include hollow profile/ solid profile and several customized profiles, with different finishing available.

Decking and Flooring’s railing solutions will add the perfect finish to your entertainment area.

Made from the same high quality composite timber.

Today with all nations advocating energy saving and emission reduction, resource shortage and environmental contamination raise more and more public concerns. We appreciate that much attention has been given to how products are made and what they are made from. In supplying products made entirely from waste plastic and waste wood, we have demonstrated our commitment to our future.

To ensure our products always exceed expectations of the purpose for which they are intended.
To supply products that are much more durable than those made from conventional material.
To provide customers the option of a new and up to date product, rather than something our previous customers requested.
As one of the new innovation of DECKING AND FLOORING’s composite range, DIY fence provide you absolute unique experience for your courtyard.

With our patent 'easy locking' system, you can build your fence much easier and faster, the aluminum frame gives strength to the structure and various 'deco parts' make your fence one of a kind.

The unique design of the fence has the identical look on both sides. It’s also resistant to insects and rot and is backed by our 25 year residential and 10 year commercial warranties.

Fencing

Make your back yard canvas a true masterpiece. Frame it with Decking and Flooring’s composite fencing system, the perfect backdrop to any back yard paradise. With lasting beauty and low maintenance, it’s the perfect fencing solution.
From the beginning we’ve been committed to helping you create a low-maintenance, high-performance secure and private backyard retreat.

Decking and Flooring’s composite fencing makes your life easier by giving your strength of wood without the maintenance.

Your weekends should be spent relaxing, not repairing your fence.

More Fence Combination
Decking and Flooring’s original cladding established the benchmark in composite cladding. A sleek and modern board, its longevity and simple installation make it the ideal choice for any commercial or residential project.
